# FIRST COMPREHENSIVE TRAINING PROGRAMME on CYBER CRIMES

»»» HPP

## Summary

Computer networks are commonly thought of as unfathomable and invisible, just beyond our grasp, while a hacker is someone who can see the connections in this arrangement, and this is what makes him an interesting and complex personality. Drawing on data acquired during the Hacker Profiling Project (HPP) set forth by UNICRI, this unique course seeks to shed some light on the controversial and intricate world of hackers by applying the science of criminal profiling to the underground hacker subculture. Who are hackers, really? What are the motives behind their targeted intrusions, phishing scams and worm proliferations? Armed with this knowledge, participants will be able to realistically assess their potential threats effectively.

The course is offered in a Basic 3-day course, as well as Intermediate and Advanced formats both totalling 5 days. All three course formats host Raoul Chiesa, one of the authors of *Profiling Hackers* as key trainer, while the Intermediate and Advanced formats will include Special Guests to complement the course material.

At the end of each course, the participant will receive a certification detailing the material covered and his or her acquired skills.

## Target Audience

Lawyers, public prosecutors, judges, attorney assistants, law enforcement officers, system or network administrators, SCADA operators and vendors, psychologists, sociologists, private investigators, criminal profilers and researchers, risk analysts, IT security managers, security consultants, journalists.

## Course Syllabus

*Basic course sample topics*

- » Hackers and their **modus operandi**;
- » Hackers and their **motivations**: how they select targets and the relationship between their motives and target selected;
- » “Career progression” in the hacker world;
- » **Deterrents**: the effects of laws and legislations, convictions and technical obstacles confronting the hacker.

The *Intermediate and Advanced* will delve into the following:

- » In depth discussion of the criminal profiling science with the authors of *Profiling Hackers*, and guest lecture by an experienced “Ethical Hacker;”
- » Overview of **hacker history** and the “**hacking eras**”, and the recent introduction of criminal elements into the hacker subculture;
- » Deep analysis of the hacker profiles or **archetypes**;
- » Introduction to the **HPP questionnaire** and analysis of the results;
- » Analysis of a recent survey of Romanian hackers.

All trainers are from @Mediaservice.net, a leading vendor-neutral security consulting company.

## Prerequisites, Equipment and Material

All participants will require a solid grasp of English, and are encouraged to bring a laptop or other personal computing device in order to better enjoy and understand the course material. Furthermore, participants would do well to have a general understanding of criminal profiling, an interest in the hacker subculture and its history.

## Dates, Language and Fees

Level	Running Dates	Subscription Deadline	Fee
Basic	February 23 – 25, 2010	February 15, 2010	1.000 €
Intermediate	March 1 – 5, 2010	February 25, 2010	2.000 €
Advanced	March 8 – 12, 2010	March 1, 2010	3.000 €

All courses will be held in English for 8 hours per day, at the United Nations Campus in Turin (Italy). Lunch and regular coffee breaks will be provided, courtesy of UNICRI. A bus shuttle service will be offered every day, before and after classes.

For further information on how to apply, or questions pertaining to the training course and accommodation please consult [www.unicri.it](http://www.unicri.it) or e-mail us at [cybertraining@unicri.it](mailto:cybertraining@unicri.it)

### United Nations Interregional Crime and Justice Research Institute (UNICRI)

UNICRI provides applied research, training programmes and technical cooperation to assist intergovernmental, governmental and non-governmental organizations in formulating and implementing improved policies in the field of crime prevention and justice. UNICRI's main goals are: to advance understanding of crime related problems; to foster just and efficient criminal justice systems; to support the respect of international instruments; to facilitate international law enforcement cooperation and judicial assistance.

The current priorities include, inter alia, activities related to justice reform, prevention and control of international terrorism, transnational organised crime, illicit trafficking, cyber crimes, and crimes against the environment.
